AMAWALK NURSERY

SPECIMEN EVERGREEN
AND DECIDUOUS TREES

THE entrance to the Nursery is opposite the railroad station at Amawalk, on the Putnam Branch of the New York Central. This railroad connects with the New York Central and Hudson River Division at High Bridge, and with the Sixth and Ninth Avenue elevated roads at Sedgwick Avenue. Amawalk is eight miles east of Peekskill on the Hudson River Division, and seven miles northwest of Mount Kisco on the Harlem Division of the New York Central. The Nursery is forty miles north of New York City, and is on the State Road from Briarcliff to Lake Mahopac. The main roads in every direction are State Roads, and motorists will find them in excellent condition. This map indicates the principal State Roads within a radius of fifty miles of Amawalk, and shows the accessibility by railroad, ferries and automobiles of the

THE AMAWALK NURSERY

Introduction

THE Amawalk Nursery, which covers 250 acres and includes 250,000 trees, was established in 1903 for the purpose of producing Specimen Evergreen and Deciduous Trees. When we use the term Specimen Trees, we mean trees that are practically perfect; trees that will be useful and ornamental from the beginning; trees that, properly planted, will develop rapidly and increase in beauty as they grow older, and that, barring unusual accidents and disease, will live until they die of old age, requiring no attention at any stage from the hands of a tree surgeon.

To produce good roots and vigorous growth in our trees, the ground is prepared with much care. It is plowed and cross-plowed repeatedly. It is subsoiled and fertilized heavily. The trees are planted unusually wide apart, and as they grow are frequently root-pruned and transplanted. Experts prune off imperfect or badly formed branches and otherwise correct any inclination towards crookedness or ugliness. Thus cared for, they develop rapidly and experience no setback after transplanting. It is only by such constant care and interest that we have been able to produce trees of greater strength, promise and beauty than are usually obtainable.

It is the custom of the Amawalk Nursery to grow only those varieties of trees which we have found to be absolutely hardy in the severe climate north of New York City. We are naturally anxious to include for the benefit of our customers as many varieties as possible, but our practice has always been never to offer for sale any tree that we are not convinced will thrive and make a vigorous growth when later transplanted to a park or private estate.

We are anxious to co-operate with our customers in making their planting a permanent success, and will advise them about the planting and care of their trees, either by letter or personal call, without cost.

The Prince of Wales planting an European Elm from the Amawalk Nursery, in Central Park, New York, in November, 1919

The American Pin Oak, four inch caliper, which General Pershing planted in September, 1919, as a Memorial Tree

General Pershing planting the above American Pin Oak from the Amawalk Nursery

The European Beech from the Amawalk Nursery which the King and Queen of Belgium planted in October, 1919, in New York City

Queen Elizabeth of Belgium planting an European Beech from the Amawalk Nursery

King Albert of Belgium planting an European Beech from the Amawalk Nursery

THE FOLLOWING
PHOTOGRAPHS TAKEN AT
THE AMAWALK NURSERY

A specimen American Pin Oak, seven inch caliper, twenty-six feet high

The European Elm resembles the American Elm, but has more luxuriant foliage

An European Elm, eight inch caliper, twenty-eight feet high, in winter

A specimen European White Birch, eight inch caliper, thirty-four feet high

An European White Birch in winter

An European Cut-leaved Weeping White Birch, six inch caliper, thirty-three feet high

The symmetrical form of the American Linden makes it well adapted for formal planting

A Norway Maple, eight inch caliper, thirty feet high. The most satisfactory deciduous tree for general use

A corner of a block of Norway Maples from six to seven inch caliper

A block of American Pin Oaks, four inch caliper, twenty feet high

The European Beech is a very valuable lawn tree

The leaves remain on the European Beech all winter, making the hedge as effective in winter as in summer

The Norway Maple is the best avenue tree for high, dry ground and exposed situations

An avenue of American Elms

An avenue of Schwedler Maples, effective for their spring coloring

An avenue of matched American Pin Oaks, from five to six inch caliper, twenty-two feet high

The Pyramidal Silver Maple is the most rapid growing avenue tree

The Colorado Blue Spruce has dignity of form as well as beauty of color

One of a large block of sheared *Retinospora Pisifera Aurea* from ten to fifteen feet high

The *Retinospora Plumosa Aurea* is well adapted to formal gardens

The Austrian Pine is an evergreen of great vigor, and is invaluable for windbreaks, as it thrives best in exposed situations

A block of sheared Norway Spruce, fourteen to sixteen feet high

The Colorado Blue Spruce will stand severe exposure

The Douglas Spruce is a hardy evergreen of rapid growth

A corner of one of our blocks of Hemlocks in winter

A Concolor ten feet high

A sheared Hemlock thirteen feet high

From a block of Norway Spruce containing hundreds of sheared specimens, fourteen to eighteen feet high, well adapted for hedges and screens

American Arborvitæ for hedges or formal planting

Koster Blue Spruce, from ten to twelve feet high

A block of sheared *Retinospora Pisifera Aurea*, for formal planting

We have hundreds of Hemlocks, ten to twelve feet high, full and bushy to the top,
available for hedge planting

An order of mixed Evergreens ready for shipment

Prices, Delivery and Guarantee

ALL the trees listed in this catalogue measure up to the highest requirements of Specimen Trees. No inferior trees are offered for sale. The yearly output of the Amawalk Nursery is about 10,000 Specimen Evergreen and Deciduous Trees. To produce that number, we have growing about 250,000 trees of all sizes.

We are always pleased to have customers visit the Nursery and choose their own trees. As none but specimens are sold, customers are allowed to select any tree growing in the Nursery at the catalogue price for its variety and size. The price per tree is the same regardless of the quantity ordered.

The prices in this catalogue are f.o.b. Amawalk. Deliveries can be made by freight, express or motor truck. For freight shipments the cars are packed on our own siding. For less than carload shipments, packing is charged for at cost. For delivery by motor truck, cost price only is charged.

We guarantee that every tree leaving our Nursery is in the best condition obtainable by scientific care and handling. If it is correctly planted in a suitable location, and receives adequate attention thereafter, it will live. As we have obviously no control over the treatment our trees receive after leaving our hands, we do not guarantee that they will live. To do so would mean increased prices and would place an unnecessary burden on those customers whose trees are properly cared for. However, to accommodate those purchasers who prefer their trees insured, we will for a pre-arranged premium agree to re-supply f.o.b. Amawalk any tree which fails to live.

We send to each customer before shipping his order, a book containing complete instructions in the planting and after care of the trees.

Deciduous Trees

Namely, those that yearly drop their leaves

Beech—*Fagus*

EUROPEAN. *Fagus Sylvatica*

The time is coming when the value of the European Beech will be as greatly appreciated in this country as it now is in England, where it is one of the favorite trees for lawn and hedge planting. As a specimen it forms a large and majestic tree, with branches growing to the ground, in contrast to the maples, oaks and other high branched trees. For hedge planting it has no equal, making a beautiful, permanent and impenetrable barrier. The old leaves remain until they are forced off by the new ones in the spring, and it is therefore as useful as the evergreens for a screen during the winter.

	Each
2 in. cal., 9 ft. high.....	\$ 9.00

11 in. cal., 32 ft. high.....	175.00

Ginkgo—Salisburia

MAIDENHAIR TREE.

Salisburia Adiantifolia

This tree has become very popular during the last few years, owing to its unusual form and its odd leaves which resemble those of the maidenhair fern. It is especially to be recommended for city planting.

	Each
2 in. cal., 11 ft. high.....	\$6.00
2½ in. cal., 11 ft. high.....	8.00
3 in. cal., 13 ft. high.....	11.00

Hawthorn—Crataegus

COCKSPUR—*Crataegus Crus-Galli*

Forms a bushy tree about ten feet high, with clusters of bright red fruit in the autumn.

	Each
4 ft. high.....	\$4.00
5 ft. high.....	5.00
6 ft. high.....	6.00

ENGLISH. *Crataegus Oxyantha*

The white blossomed Hawthorn of the English hedgerows.

	Each
6 ft. high.....	\$6.00
7 ft. high.....	7.00
8 ft. high.....	8.00

PAUL'S SCARLET. *Crataegus Coccinea*

A beautiful variety of Hawthorn which bears red flowers.

	Each
6 ft. high.....	\$6.00
7 ft. high.....	7.00

Horsechestnut—Aesculus

WHITE DOUBLE-FLOWERING

Aesculus Hippocastanum Flore Albo Pleno

The finest variety of Horsechestnut. It has double flowers and bears no nuts and hence is best for park and avenue planting.

	Each
4 in. cal., 15 ft. high.....	\$12.00
4½ in. cal., 16 ft. high.....	15.00
5 in. cal., 17 ft. high.....	20.00

6½ in. cal., 20 ft. high.....	45.00
7 in. cal., 21 ft. high.....	55.00

Linden—Tilia

AMERICAN. *Tilia Americana*

A handsome native shade tree which grows very quickly and thrives in the poorest soil. It forms a very symmetrical avenue tree. The fragrant white flowers appear in June.

	Each
5 in. cal., 22 ft. high.....	\$20.00
5½ in. cal., 23 ft. high.....	25.00
6 in. cal., 24 ft. high.....	35.00
6½ in. cal., 25 ft. high.....	45.00
7 in. cal., 26 ft. high.....	55.00

CRIMEAN. *Tilia Dasystyla*

This variety is notable for its glossy green foliage, which retains its freshness until late in the fall. The twigs are a bright yellow.

	Each
2 in. cal., 10 ft. high.....	\$5.00
2½ in. cal., 12 ft. high.....	6.00
3 in. cal., 14 ft. high.....	8.00

EUROPEAN LARGE-LEAVED

Tilia Platyphyllos

The broad-leaved variety, which forms the largest tree of all the Lindens.

	Each
3 in. cal., 18 ft. high.....	\$8.00
3½ in. cal., 20 ft. high.....	10.00

7 in. cal., 24 ft. high	65.00
7½ in. cal., 24 ft. high	75.00
8 in. cal., 24 ft. high	85.00

Magnolia

The Magnolia is the earliest of the flowering trees, being covered with blossoms before the leaves appear.

SOULANGE'S. *Magnolia Soulangeana*

The hardiest of the Chinese Magnolias. The flowers are white inside and pink without.

	Each
4 ft. high	\$6.00
5 ft. high	8.00

Maple—Acer

NORWAY. *Acer Platanoides*

The Norway Maple is one of the most satisfactory trees for either street or lawn planting. It grows rapidly in even the poorest soil and most exposed situations and suffers practically no setback after transplanting. It forms a large tree with a spreading head and deep green leaves, which remain on the tree until November. The only condition in which the Norway Maple will not thrive is in very wet ground. There it is safer to plant the Sugar or Silver Maple.

The Amawalk Nursery contains thirty thousand specimen Norway Maples from two to nine-inch caliper, the largest stock of these trees in this country.

	Each
2½ in. cal., 16 ft. high	\$ 6.00
3 in. cal., 18 ft. high	8.00

7½ in. cal., 30 ft. high	65.00
8 in. cal., 31 ft. high	80.00
8½ in. cal., 32 ft. high	95.00
9 in. cal., 33 ft. high	110.00

GLOBE-HEADED NORWAY

Acer Platanoides Globosum

An unusual grafted form of Norway Maple. These are splendid specimens with dense, round heads of very compact growth. They are very effective in formal planting as a substitute for the more common Catalpa Bungeii.

5 to 7 foot stems.

	Each
4 in. cal., 12 ft. spread	\$30.00
4½ in. cal., 13 ft. spread	40.00
5 in. cal., 14 ft. spread	50.00

SCHWEDLER'S NORWAY

Acer Platanoides Schwedleri

A variety of the Norway Maple with very brilliant coloring. The foliage in the spring is blood-red, turning later to a rich, very dark green.

	Each
2½ in. cal., 13 ft. high	\$6.00
3 in. cal., 14 ft. high	8.00
3½ in. cal., 15 ft. high	10.00

PYRAMIDAL SILVER

Acer Dasycarpum Pyramidalis

The best tree to plant where a rapid grower is desired for immediate effect. It is a new and superior variety of the Silver Maple, of compact, symmetrical form and remarkably quick growth.

	Each

PURPLE-LEAVED SYCAMORE

Acer Pseudo-Platanus Atropurpureum

A very fine lawn tree with remarkably beautiful foliage. The leaves are a rich, dark green above, and deep, purplish red on the under side, and retain this coloring until fall, when the red becomes more brilliant and the green turns to clear yellow.

	Each
4½ in. cal., 20 ft. high.....	\$20.00
5 in. cal., 21 ft. high.....	25.00
5½ in. cal., 22 ft. high.....	35.00

Japanese Maple—*Acer Palmatum*

The Japanese Maple forms a small low branched tree, growing not more than

twenty feet high. It is very extensively used for its brilliant coloring and is most effective when several specimens are massed together.

DARK PURPLE-LEAVED

Acer Palmatum Atropurpureum

The leaves of this variety are blood-red in the spring, turning to a rich purple which lasts throughout the summer.

	Each
7 ft. high.....	\$13.00
8 ft. high.....	16.00
9 ft. high.....	20.00
10 ft. high.....	25.00
11 ft. high.....	30.00
12 ft. high.....	35.00
13 ft. high.....	45.00
14 ft. high.....	55.00

OSAKAZUKI. *Acer Palmatum Osakazuki*

The best variety to plant for fall coloring. The leaves are green in the summer and become bright red in the autumn.

	Each
7 ft. high.....	\$13.00
8 ft. high.....	16.00
9 ft. high.....	20.00
10 ft. high.....	25.00

Nettle Tree—*Celtis*

Celtis Occidentalis

An unusually hard native tree, which will withstand the most adverse conditions. It grows with a wide-spreading head, and is especially to be recommended for planting in dry ground.

	Each
2½ in. cal., 11 ft. high.....	\$6.00
3 in. cal., 13 ft. high.....	8.00
3½ in. cal., 14 ft. high.....	10.00
4 in. cal., 15 ft. high.....	12.00
4½ in. cal., 16 ft. high.....	15.00

Oak—*Quercus*

It is generally considered that the Oaks are of very slow growth, and for that reason they are not planted as extensively as their beauty and vigor merit. This is a mistaken idea. The Oaks here catalogued make nearly as rapid a growth as, for example, the Sugar Maple.

AMERICAN PIN. *Quercus Palustris*

The most rapid growing of the Oaks. It is a very beautiful variety, distinguished by its long, somewhat drooping branches. The foliage is deeply cut and turns orange and scarlet in the fall.

	Each
2½ in. cal., 14 ft. high.....	\$ 7.00
3 in. cal., 16 ft. high.....	10.00

AMERICAN PIN OAK—*Continued*

	Each
3½ in. cal., 18 ft. high.....	\$13.00

5½ in. cal., 26 ft. high.....	40.00
6 in. cal., 27 ft. high.....	50.00
6½ in. cal., 28 ft. high.....	60.00

AMERICAN SCARLET. *Quercus Coccinea*

Similar in habit to the Red Oak, but with smaller and more deeply cut foliage which turns brilliant crimson.

	Each
3½ in. cal., 20 ft. high.....	\$13.00
4 in. cal., 25 ft. high.....	16.00
4½ in. cal., 26 ft. high.....	20.00
5 in. cal., 27 ft. high.....	30.00

ENGLISH. *Quercus Robur Pedunculata*

Forms a large tree with spreading branches and a broad round-topped head.

	Each
3½ in. cal., 20 ft. high.....	\$15.00
4 in. cal., 22 ft. high.....	20.00
5 in. cal., 24 ft. high.....	35.00
6 in. cal., 26 ft. high.....	50.00

Poplar—*Populus*

LOMBARDY. *Populus Nigra Fastigiata*

A very quick growing tree, used in landscape work for its narrow pyramidal form.

	Each
3½ in. cal., 25 ft. high.....	\$8.00
4 in. cal., 28 ft. high.....	10.00
4½ in. cal., 30 ft. high.....	13.00

Tulip Tree—*Liriodendron*

Liriodendron Tulipifera

A native forest tree of tall, pyramidal habit. It has light green, glossy foliage, and tulip-shape flowers.

	Each
3 in. cal., 18 ft. high.....	\$8.00
3½ in. cal., 18 ft. high.....	11.00
4 in. cal., 19 ft. high.....	15.00
4½ in. cal., 19 ft. high.....	20.00
5 in. cal., 20 ft. high.....	30.00

Willow—*Salix*

The willows are among the most satisfactory trees to plant in very wet ground, where they make rapid growth.

LAUREL-LEAVED. *Salix Pentandra*

A small upright tree with shining, dark, green leaves.

	Each
3 in. cal., 12 ft. high.....	\$7.00
3½ in. cal., 14 ft. high.....	9.00
4 in. cal., 16 ft. high.....	11.00

5 in. cal., 20 ft. high.....	17.00
5½ in. cal., 21 ft. high.....	20.00
6 in. cal., 23 ft. high.....	25.00
6½ in. cal., 24 ft. high.....	30.00
7 in. cal., 25 ft. high.....	35.00
7½ in. cal., 25 ft. high.....	40.00
8 in. cal., 26 ft. high.....	50.00
8½ in. cal., 26 ft. high.....	60.00
9 in. cal., 27 ft. high.....	70.00

SALMON BARKED

Salix Vitellina Britzensis

The bark is salmon colored and very conspicuous in winter when it turns a golden red.

	Each
3 in. cal., 12 ft. high.....	\$7.00
3½ in. cal., 13 ft. high.....	9.00
4 in. cal., 14 ft. high.....	11.00

THURLOW'S. *Salix Elegantissima*

This variety grows in symmetrical form, with a straight trunk and drooping branches.

	Each
3½ in. cal., 16 ft. high.....	\$9.00
4 in. cal., 17 ft. high.....	11.00

WEeping. *Salix Babylonica*

The well-known Weeping Willow. These trees grow in picturesque, irregular forms, with spreading branches.

	Each
2½ in. cal., 12 ft. high.....	\$6.00
3 in. cal., 15 ft. high.....	7.00
3½ in. cal., 16 ft. high.....	9.00
4 in. cal., 17 ft. high.....	11.00

Conifers

Namely, the cone-bearing trees, but generally understood
to refer to the evergreens

Arborvitae *Thuja*

AMERICAN. *Thuja Occidentalis*

A native evergreen of pyramidal growth especially adapted for hedges and formal planting.

	Each
4 ft. high.....	\$5.00
5 ft. high.....	6.00
6 ft. high.....	7.00
7 ft. high.....	8.00
8 ft. high.....	10.00
9 ft. high.....	13.00
10 ft. high.....	15.00
11 ft. high.....	20.00
12 ft. high.....	25.00

GLOBE. *Thuja Globosum*

A dwarf, globe-shaped variety, useful for planting in borders.

	Each
2 ft. high.....	\$4.00
2½ ft. high.....	5.00

SIBERIAN. *Thuja Occidentalis Wareana*

A very hardy variety of compact growth and dark green coloring.

	Each
3 ft. high.....	\$5.00
4 ft. high.....	7.00
5 ft. high.....	9.00

Cryptomeria

Cryptomeria Lobbi Compacta

A distinctive rapid growing Japanese evergreen, having light green foliage which assumes a brownish tinge in the autumn.

	Each
7 ft. high.....	\$12.00
8 ft. high.....	15.00

Hemlock—*Tsuga*

HEMLOCK SPRUCE. *Tsuga Canadensis*

A graceful and beautiful evergreen. Very ornamental when planted singly, and as it stands close shearing it also forms a splendid hedge. It is the only evergreen that can be grown in a partial shade.

We can supply Hemlocks in the following sizes, either closely sheared for formal effects and hedge planting, or with their natural open growth.

	Each
9 ft. high.....	\$20.00
10 ft. high.....	25.00
11 ft. high.....	30.00
12 ft. high.....	40.00
13 ft. high.....	50.00
14 ft. high.....	60.00
15 ft. high.....	70.00
16 ft. high.....	80.00

Juniper—*Juniperus*

RED CEDAR. *Juniperus Virginiana*

Our native Red Cedar, which will grow on the dryest hillside. Its narrow, pyramidal shape makes it valuable in landscape work.

	Each
4 ft. high.....	\$5.00
5 ft. high.....	6.00
6 ft. high.....	7.00

BLUE CEDAR

Juniperus Virginiana Glauca

Similar to the Red Cedar, but of an unusually beautiful violet blue color.

	Each
6 ft. high.....	\$8.00
7 ft. high.....	10.00
8 ft. high.....	12.00

Larch—*Larix*

JAPANESE. *Larix Kaempferi*

This is the finest species of Larch and very rare. The foliage turns to a rich shade of burnt orange in the autumn.

	Each
10 ft. high.....	\$10.00
11 ft. high.....	12.00
12 ft. high.....	14.00
13 ft. high.....	17.00
14 ft. high.....	20.00
15 ft. high.....	25.00
16 ft. high.....	30.00

Pine—Pinus

AUSTRIAN. *Pinus Austriaca*

The hardiest evergreen grown. It thrives in the most exposed situations and is adapted to any soil except very wet ground. It forms a stately and symmetrical tree with spreading branches and rich, dark green needles.

	Each
9 ft. high.....	\$20.00
10 ft. high.....	25.00
11 ft. high.....	30.00
12 ft. high.....	35.00
13 ft. high.....	40.00
14 ft. high.....	50.00
15 ft. high.....	60.00
16 ft. high.....	70.00
17 ft. high.....	80.00
18 ft. high.....	95.00

MUGHO. *Pinus Mughus*

A dwarf variety, with dark green foliage, suitable for growing in evergreen groups and rockeries.

	Each
1 ft. high.....	\$3.00
1½ ft. high.....	4.00
2 ft. high.....	5.00

SCOTCH. *Pinus Sylvestris*

A hardy variety of Pine adapted to dry soil. It grows rapidly, and has short bluish green needles.

	Each
6 ft. high.....	\$8.00
7 ft. high.....	11.00
8 ft. high.....	15.00

WHITE. *Pinus Strobus*

A popular variety of Pine. It grows rapidly and has soft, light green needles.

	Each
5 ft. high.....	\$5.00
6 ft. high.....	7.00
7 ft. high.....	10.00
8 ft. high.....	13.00
9 ft. high.....	16.00
10 ft. high.....	20.00
11 ft. high.....	25.00
12 ft. high.....	30.00
13 ft. high.....	35.00
14 ft. high.....	45.00
15 ft. high.....	55.00
16 ft. high.....	65.00
17 ft. high.....	75.00
18 ft. high.....	90.00

Pinus Strobus Umbraculifera

A dwarf Pine which grows in the form of the Mugho, but has the light green foliage of the White Pine.

	Each
1½ ft. high.....	\$3.00
2 ft. high.....	4.00
2½ ft. high.....	5.00
3 ft. high.....	6.00

Retinospora Chamaecyparis

The Retinosporas are very decorative evergreens and are especially suitable for formal gardening.

FILIFERA

A low, spreading variety, with fine, bright green foliage.

	Each
1½ ft. high.....	\$5.00
2 ft. high.....	6.00

FILIFERA AUREA

The golden form of the above. It keeps its brilliant coloring throughout the year.

	Each
2 ft. high.....	\$6.00
3 ft. high.....	8.00

PISIFERA

Forms a medium sized tree, graceful and open in contour.

	Each
3 ft. high.....	\$5.00
4 ft. high.....	6.00

PISIFERA AUREA

The golden form of the above. The new growth is a rich, golden yellow, changing later to a greener shade.

	Each
4 ft. high.....	\$6.00
5 ft. high.....	8.00
6 ft. high.....	10.00
7 ft. high.....	13.00
8 ft. high.....	16.00
9 ft. high.....	20.00
10 ft. high.....	25.00
11 ft. high.....	30.00
12 ft. high.....	35.00
13 ft. high.....	40.00
14 ft. high.....	45.00
15 ft. high.....	60.00

PLUMOSA

The hardiest of the green Retinosporas. Will stand close shearing.

	Each
2½ ft. high.....	\$4.00

PLUMOSA AUREA

The finest golden evergreen for formal effects. Our specimens are closely sheared in round or pyramidal form.

	Each
3 ft. high.....	\$5.00
4 ft. high.....	6.00
5 ft. high.....	8.00
6 ft. high.....	10.00
7 ft. high.....	13.00
8 ft. high.....	16.00
9 ft. high.....	20.00
10 ft. high.....	25.00

SILVER. *Retinospora Squarrosa Veitchii*

Of a rich silvery blue color and makes a beautiful contrast with the green and golden tints of other varieties.

	Each
1½ ft. high.....	\$4.00

Spruce and Fir— Picea and Abies

COLORADO BLUE. *Picea Pungens Glauca*

Grown on its own roots. It is a vigorous, compact tree, very symmetrical in form and beautiful in color.

	Each
6 ft. high.....	\$ 9.00
7 ft. high.....	11.00
8 ft. high.....	13.00
9 ft. high.....	16.00
10 ft. high.....	20.00

12 ft. high.....	35.00
13 ft. high.....	40.00
14 ft. high.....	50.00

NORWAY. *Picea Excelsa*

A popular and inexpensive evergreen which grows rapidly and will thrive in exposed situations.

We can supply Norway Spruce in the following sizes, either closely sheared for formal effects and hedge planting, or with their natural open growth.

	Each
10 ft. high.....	\$20.00
11 ft. high.....	25.00
12 ft. high.....	30.00
13 ft. high.....	35.00
14 ft. high.....	40.00
15 ft. high.....	45.00
16 ft. high.....	50.00
17 ft. high.....	60.00
18 ft. high.....	70.00
19 ft. high.....	80.00
20 ft. high.....	90.00
21 ft. high.....	100.00
22 ft. high.....	115.00

WHITE. *Picea Alba*

A native tree of compact pyramidal growth and silvery green foliage.

	Each
4 ft. high.....	\$6.00
5 ft. high.....	8.00

Instructions for Planting

All trees may be transplanted in the spring, from the time the frost is out of the ground until the new growth is far advanced. In the locality of Amawalk, deciduous trees can usually be transplanted from the end of March until the middle of May, and evergreens until the first of June.

Evergreens can again be transplanted during August and September, as their roots make a second growth at that time.

The fall planting season occurs when the trees become dormant, usually about the end of October, and lasts until about the first of December when the ground freezes. All evergreens and most deciduous trees can be planted at that time.

The more tender varieties of evergreens should be protected during the first winter. All of the deciduous trees listed in our catalogue may be transplanted in the fall except the Birches, Silver Maples, Scarlet Maples and Tulips.

All trees should be planted as soon as received. It is very important that the roots should not dry out by exposure to air or heat.

Evergreens and some varieties of deciduous trees are shipped with a ball of earth burlapped around their roots, which should be kept moist until the tree is planted.

Great care should be taken in planting.

The holes for the trees should be large enough to allow the roots to spread out to their fullest extent. Trees must be planted at the exact depth at which they grew. This is shown by the mark of the soil around the trunk.

If the ground is not fertile, good soil should be secured to fill in the holes. When this is not necessary, the top soil, being richer than the sub-soil, should be put in first. The dirt in the hole must be firmly packed down, so that the tree will not work loose.

When trees are planted in exposed situations they must be guyed to hold them firmly in place until their roots become established.

Trees need to be thoroughly watered when planted, and regularly thereafter. Once or twice a week is often enough, but plenty of water should be used.

It is well to remember that the roots of trees are comparatively deep in the ground, differing from plants, and the whole root area must be thoroughly soaked with water to insure successful planting.

If the planting is done in dry ground, only sufficient earth should be put in the hole to cover the roots. Then water should be poured in and the soaked earth allowed to settle before the hole is filled up. This particularly applies to evergreens.

Cultivation of the ground around the trees after they are planted is very important. The soil should be worked with a hoe at least once a week to keep the ground from becoming hard. This allows air and moisture to reach the roots.

The Amawalk Nursery has prepared an illustrated booklet giving detailed instructions in the planting and after care of trees. This booklet is sent to each customer before their order is shipped, and will be forwarded to any one upon request.
